Kopergaon, Maharashtra

OBJECTIVE

A highly motivated Computer Engineering student specializing in Artificial Intelligence and Machine Learning, with strong academic performance and hands-on training in SAP ABAP. Seeking an opportunity to begin a career as an SAP ABAP Developer, where I can apply my technical expertise, contribute to impactful business solutions, and continuously enhance my skills in a growth-oriented organization.

EDUCATION

B.Tech in Computer Engineering(AIML)

(Sanjivani University , Kopergaon(On Going) | 2024-2027)

CGPA: 6.55 / 10.0

Diploma In Mechatronics

(Sanjivani KBP Polytechnic , Kopergaon | 2021-2023)

Percentage :70.07%

SSC (Atma Malik Gurukul Kokamthan, Kopergaon | 2020-2021)

Percentage : 77.40%

SAP TECHNICAL SKILLS

1) SAP ABAP

1. **Data Dictionary** : Database tables, TMG, Views, Search Help, Type Group, Lock Object
2. **ABAP Workbench Fundamentals** : Open SQL (CRUD operations), Declaring Internal Table and Workarea
3. **Modularisation Techniques** : Subroutine, Function Module, Include Programs
4. **Report Types** : Classical, Interactive and ALV(ABAP List Viewer.)
5. **Batch data Communication** : Recording, BDC Methods - 1.Call Transaction Method, 2.Uploading data from File
6. **Enhancement** : Finding BADI, Implementing BADI, Customer Exit
7. **Debugging Techniques** : Break-points, Watch points

2) SAP HANA

1. Core Data Services (CDS) views
2. Abstract Data Type (ADT)
3. Object-Oriented Programming (OOP)
4. SAP Business Technology Platform (BTP)
5. RESTful Application Programming Model (RAP)

PROJECTS

1) SAP Sales Report using ALV

- Developed an interactive ALV (ABAP List Viewer) report to display sales data
- Implemented sorting, filtering, and dynamic field catalog
- Used Open SQL to fetch data from database tables

2) Employee Management System (SAP ABAP)

- Designed a system to manage employee records (Create, Read, Update, Delete)
- Created custom database tables using Data Dictionary
- Implemented input validation and modularized code using function modules
- Integrated reporting features for employee data analysis

3) IoT-Based Smart Water Quality Monitoring System

- Built a real-time system using sensors to monitor pH, turbidity, and TDS levels
- Integrated Arduino with Python for real-time data processing
- Applied machine learning model to predict water quality
- Visualized sensor data using graphs and dashboards

CERTIFICATIONS & ACHIEVEMENTS

1. Pursuing SAP Certified Associate - Back-End Developer - ABAP Cloud
 2. Cloud Fundamental – IBM
 3. Devops Fundamental – IBM
 4. ML using Watson Studio – IBM
 5. IBM SPSS – IBM
 6. Top 10 Finalist – Tata Technologies InnoVent 2026
-

TRAININGS

SAP ABAP Trainee – Primus Training Institute (Currently Pursuing)

- Gaining hands-on experience in ABAP Workbench and Data Dictionary
 - ALV reports, SmartForms, and enhancement techniques
 - Practicing debugging and real-time SAP development concepts
-
